

HumanityX (\$HMX) Whitepaper

Empowering Humanity Through Decentralized Giving

1. Abstract

HumanityX (\$HMX) is a decentralized cryptocurrency designed to fund charitable causes such as food drives, homeless shelters, and missionary work. With a deflationary token model and built-in charitable distributions, HumanityX leverages blockchain transparency to drive real-world impact. Through a unique voting system, \$HMX holders can help decide which humanitarian efforts are prioritized — ensuring that every voice in the community matters.

2. Mission Statement

HumanityX exists to create financial equality, eliminate food insecurity, and uplift the most vulnerable populations through the power of community and technology. Our mission is to decentralize compassion by allowing every \$HMX holder to contribute to real change in a transparent, impactful way.

3. The Problem

In a world filled with abundance, millions still suffer from hunger, homelessness, and lack of access to basic human needs. Traditional aid organizations are often bogged down by inefficiency, lack of transparency, and limited scalability. Donors have little visibility into where their money goes or how it's used.

4. The Solution: HumanityX

HumanityX brings charity into the modern era using smart contracts and blockchain accountability. Every transaction helps power the mission — whether by funding food programs, housing initiatives, or missionary activities. Token holders are more than investors — they're decision-makers and changemakers.

5. Tokenomics

Every transaction with \$HMX is taxed to support the mission while sustaining the token's ecosystem.

Tax Allocation	Percentage
Charity Wallet	2.5%
Auto Liquidity	1.0%
Burn (Deflationary)	1.0%
Operations (OpEX)	1.5%
Total Tax	6.0%

Additional Token Details:

- Total Supply: 1,000,000,000 \$HMX
- Max Burn: 30% of total supply (300,000,000 tokens)
- Chain: Cronos Network (CRO)
- Auto liquidity provides stability and easier trading on DEXs.
- Burn mechanism decreases supply over time, potentially increasing value.

6. Charity Wallet: Use of Funds

The 2.5% allocated to the charity wallet is distributed regularly to support:

- Food drives in underserved communities
- Temporary and permanent housing for the homeless

- Support for global missionaries and humanitarian workers
- Emergency relief for natural disasters and crises

All expenditures will be accompanied by transparent proof, including receipts, updates, and media posted on the HumanityX website and official channels.

7. Community Governance & Voting

We believe in democratizing charity.

\$HMX holders will vote on upcoming charitable projects, helping direct how funds from the charity wallet are allocated. Using on-chain or off-chain voting mechanisms (e.g., Snapshot), the community can choose:

- Which region or country receives aid next
- Which cause is most urgent (e.g., hunger vs shelter)
- Which organizations or grassroots partners to support

This gives HumanityX users a voice and makes giving truly decentralized.

8. Roadmap

Phase	Milestone
Phase 1	Token Development, Testing on Cronos Testnet
Phase 2	Whitepaper & Website Launch
Phase 3	Mainnet Deployment
Phase 4	CEX & DEX Listings (Crypto.com, MMF, etc.)

Phase 5 Governance Portal for Voting

Phase 6 Public Donation Ledger + Video Evidence of Impact

Phase 7 Partnerships with NGOs and Global Expansion

9. Security

- Contract built using OpenZeppelin libraries
 - Burn wallet is verifiably dead
 - Owner wallet address is public and trackable
 - Taxes can be adjusted with governance input (post-launch)
 - Future audits planned before centralized exchange listings
-

10. The Team

HumanityX is built by a small team of passionate developers and humanitarians who believe in blockchain as a tool for good. While initially pseudonymous, key team members may be doxxed in future phases to build trust and transparency.

11. Conclusion

HumanityX is more than a cryptocurrency — it's a movement. Every transaction contributes to a more equitable world. Through smart tokenomics, automated donations, and community voting, we're giving control back to the people — and giving hope to those who need it most.

Join us as we reshape what it means to give.
